GENERAL INFORMATION:

APPLICANT: Abbott Laboratories

APPLICANT: Magnuson, Michael T.

APPLICANT: Magnuson, Scott R.

APPLICANT: Magnuson, Scott R.

APPLICANT: Morgan, Douglas W.

ITILE OF INVENTION: HUMAN MATRIX METALLOPROTEASE GENE,

ITILE OF INVENTION: PROTEINS ENCODED THEREFROM AND METHOD

ITILE OF INVENTION: OF USING SAME

ITILE OF INVENTION: OF USING SAME

CURRENT APPLICATION NUMBER: US/09/391,104

CURRENT FILING DATE: 1999-09-07

PRIOR APPLICATION NUMBER: US/08/814,394
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     APPLICANT: KOJ1, YOShimura

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         80

; Sequence 13, Application US/09950510
; Patent No. 6740514
; GENERAL INFORMATION:
APPLICANT: Curtis, ROTY
; TITLE OF INVENTION: 4798, A No. 6740514el H
FILE REFERENCE: 10147-45U1
; CURRENT APPLICATION NUMBER: US/09/950,510
; CURRENT FILING DATE: 2001-09-10
PRIOR APPLICATION NUMBER: 60/251,156
PRIOR APPLICATION NUMBER: 60/251,156
PRIOR FILING DATE: 2000-09-08
; NUMBER OF SEQ ID NOS: 24
; SOFTWARE: Patentin version 3.0
; SEQ ID NO 13
; LENGTH: 1335
; TYPE: DNA
; ORGANISM: Homo sapiens
